Note. Participant accuracy and precision (in degrees) are computed as mean (M) and standard deviation (SD) across all ten measurement sessions per participant. Data based on all 74 presented target locations. Age given in years; HMD – head mounted display used; Lab – lab hardware used with this participant (cf. Methods); Days – number of individual testing days; IPD – inter-pupillary distance at optical infinity (in mm); Prescriptions given in diopters; M – male; F – female; C – contact lenses; G – glasses.

^a Not measured in this participant.

^b This participant wore bifocals, prescription values given for the far viewing part of the lenses.
